

Summary

Digital Transformation | Business & Systems Analyst | Technical Project Management | AI & Data Analytics | M.S. in MIS
Business and technology professional with an M.S. in Management Information Systems (MIS) and a strong foundation in digital transformation, business analysis, systems analysis, and technical project management. Experienced in translating business needs into scalable digital solutions through data analytics, AI, enterprise systems, and software development.

Combines strategic thinking with hands-on technical expertise to drive innovation, process optimization, and organizational transformation.

Core Competencies

- **Digital Transformation:** Digital Strategy, Process Improvement, Business Process Optimization, Digital Innovation.
- **Business & Systems Analysis:** Business Analysis, Systems Analysis, Requirements Gathering, Analysis, Functional Requirements, Solution Design, Process Modeling & Mapping, UML, Use Case Modeling.
- **Technical Project Management:** Agile, Waterfall, SDLC, Project Planning, Project Coordination, Risk Management, Stakeholder Management.
- **Data & AI:** Power BI, SQL, R, Data Analytics, Data Visualization, Applied AI, Prompt Engineering.
- **Systems & Architecture:** Database Design, ERD, Relational & NoSQL Databases, MVC Architecture, REST APIs, Webhooks.
- **Software Development:** Java, JavaScript, Node.js, PHP, HTML, CSS.
- **Cloud & Infrastructure:** AWS Cloud, AWS CLI, Amazon ECR, Serverless Computing, Event-Driven Architecture, Active Directory, VPN, LAN, Cisco Networking.
- **Cybersecurity:** Fortinet, Network Security, Access Control, Firewalls.
- **Professional Skills:** Leadership, Problem-Solving, Teamwork, Adaptability, Strategic Thinking

Education & Research

Master of Science in Management Information Systems,

Fairleigh Dickinson University, New Jersey, USA

December 2025

Research Focus:

- SQL vs. NoSQL Database Performance
- Saudi Arabia's National AI Policy: Analyzing SDALA's Role in Digital Transformation and Data Governance

Experience

Saudi Arabian Permanent Mission to the United Nations– New York, USA

IT Intern

May 2025 – Jul 2025

- Addressed over fifty hardware and software issues, reducing the IT backlog by 20%
- Managed more than seventy system setups, password resets, and support tickets using Active Directory
- Configured Cisco routers and printers to enhance Wi-Fi stability
- Maintained secure VPN and LAN access; documented technical procedures

Wallan Trading Company– Riyadh, Saudi Arabia

Data Entry Specialist – Development Dept

Mar 2021 – Mar 2022

- Verified upwards of five hundred records per month utilizing MS Excel, OneDrive, and Google Drive
- Led workflow resulting in a 15% increase in entry speed and 25% improvement in accessibility
- Implemented quality control processes, raising accuracy standards by 10%

Projects & Certifications

- Developed 20+ programming labs using Java and R.
- Designed and developed two end-to-end information systems.
- Developed and deployed a blockchain DApp.
- Built three full-stack web applications integrating databases and REST APIs
- AWS, IBM, and Fortinet Certified.
- IBM Software Engineer for Web Development.
